Topic: NOVELL's PlateSpin Forge

PlateSpin Forge revolutionizes the way disaster recovery solutions are deployed, tested and managed by offering an affordable and easy-to-use solution for protecting all workloads in the data center. With PlateSpin, data centers can protect whole server workloads-both system and data volumes- within a single bootable recovery environment using virtualization. Providing consolidated workload protection and rapid recovery with no need for costly duplicate hardware and software, PlateSpin Forge is disaster recovery evolved.

This product is for windows, linux, and unix environments, so it's not for I series, but since everyone has Windows and everyone is always looking for a better way to prepare for disaster recovery, it ought to be a good time for our Mr Mug Group.
