This is our annual Thanksgiving meeting with traditional Thanksgiving fare.

Please register for the meeting at mrmug.org or email your reservation to Vicki Pawloski (vpawloski@ciber.com) with your name and the date of the meeting that you are going to attend.

Topic - Modernizing Your IBM Document Design and Distribution

Updating the look and feel of plain-text spool file printouts is one of the most common modernization challenges that IBM i shops face. Today's end users demand modern-looking, graphical documents in electronic formats like PDF.

Join Jon Jeuck, Quadrant Software's Product Marketing Manager, for a virtual presentation on November 17th at MRMUG. He'll review some of the best practices and things to look for when reviewing IBM i document design and distribution solutions, including the ability to:

- Modernize your critical IBM i generated forms, checks and labels
- Create graphical overlays from a desktop WYSIWYG editor
- Automatically archive and email documents as PDF
- Instantly modernize ERP documents with pre-mapped templates
- Capture and merge signatures
- Access documents in a secure web-based portal

Speaker – Jon Jeuck

Product Marketing Manager at Fresche

Jon has spent over 5 years at Quadrant Software (a division of Fresche) guiding the development of IBM i spool file design and distribution solutions and promoting their use. With 11 years in tech and software, Jon has seen countless organizations maximize the value of their IBM i platform - while improving customer service - by modernizing their IBM i document output processes.
